Rever announces an international distribution agreement with Hermitage Solutions

REAL GDPR Solution enables fast and complete compliance for organizations

Brussels, Belgium : The Belgian information governance specialist REVER has just signed an agreement with the European distributor of security, infrastructure and network solutions HERMITAGE SOLUTIONS.

« Hermitage Solutions will propose to its network of specialized partners the RGS (Real GDPR Solution) software suite which is a very complete solution to become GDPR compliant and comes in two versions: one for SMEs and one more dedicated to very large organizations. It covers the legal, business and IT aspects of organizations » says Jean-François Liénart, Alliance Manager at Rever.

Dominique Orban de Xivry, Rever's CEO, « is delighted with this alliance that will allow our unique solution to be highlighted to business professionals in search of a complete tool to process structured and unstructured data (computer applications, texts...) in the framework of the GDPR ».

About Rever: since 2004, Rever offers a range of automated solutions for the detailed understanding of existing IT applications in Europe and the U.S. Proud of the precision of our products, we also propose information governance services and develop GDPR tools from our offices in Brussels and Namur.

About Hermitage Solutions: a value-added distributor of enterprise solutions, specialized in Security/Networks/Infrastructure. Based in Lyon since 2001, with an office in Belgium and another in England, Hermitage Solutions aims to offer its customers the most advanced technologies in IT security.
